

China Wind Power 2009 Beijing

Meeting the industry professionals
Driving the industry development

www.chinawind.org.cn

Hosted by

Global Wind Energy Council (GWEC)
Chinese Renewable Energy Industries Association (CREIA)
Chinese Wind Energy Association (CWEA)

Organized by

Beijing CCID Conference and Exhibition Co., Ltd.

Working Together—— building up a valuable Platform

With the rapid growth of China's wind power industry, there has also been an increase in wind energy exhibitions in various regions in China over the past few years. To create one regular China-wide industry event and ensure the continued advancement of the wind power industry in China, The Chinese Renewable Energy industries association (CREIA), The Chinese Wind Energy Association (CWEA) and Global Wind Energy Council (GWEC) decided to host an annual China International Wind Power Exhibition. This event is aimed to provide a platform for experts, decision-makers and manufactures to share best practices, developers and investors to exchange and display technology, all to promote the rapid and development of wind power industry in china and beyond.

On 29 October 2008, a fantastic display of traditional Chinese drummers launched Global Wind Power 2008 and China Wind Power 2008 in the New China International Exhibition Center (New CIEC). The event attracted both domestic and international professionals with its 16,000 m² show area and 249 companies.

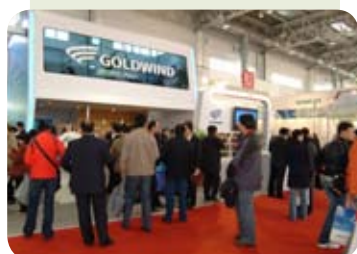

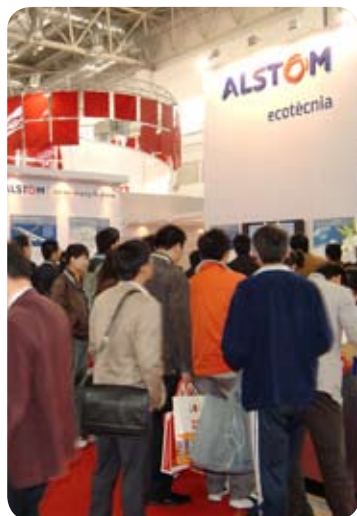

Over 12,000 professional visitors toured the exhibition where all of the world's leading turbine manufacturers displayed their technology. Other exhibitors included over 200 component suppliers covering the whole supply chain from turbines, blades, bearings, gearboxes, hubs, towers, to yawing system, controlling systems, transmission systems and monitoring systems. Such a meeting place for the entire industry in China is important so that technology can be shared and business can be made.

Wind Power —— a right choice for big country of energy consumption

The fossil fuel being closer to exhaustion than ever before, and the worsening climate and environment problems caused by green house gas emissions have put the development and utilization of renewable energy resources into the spotlight of the international community. As a major renewable energy, wind power is influencing the world at an unprecedented development speed. The wind power installation capacity of china has had an annual growth rate of 100% for the past three years. Although wind farms contribute only less than 1% of the total power generation in China, power generated by wind farms in Denmark and northern Germany takes already 40% of the total power generation. No doubt we are far behind, but the difference also implies greater expectations. At least it shows that wind power is no longer playing a minor role in the power industry and there is certainly a big potential for its development. This development being guaranteed both in legislation and in the schedule by The Long and Mid-term Development Plan for Renewable Energy, wind power growth in China will take off soon.

China—— focus of global wind power industry

Rich wind resources and strong support in regulations by the government have enabled the wind power industry of China to grow at a fast speed and the primary market scale has been achieved, making it the second largest wind power market in the world, next to USA. The world is paying its attention to China. Meanwhile there are difficulties and problems yet to be overcome by the wind power industry in China, such as the bottleneck of technologies and management, the balance between fast growth and the sustainable growth. China needs to communicate with the world therefore. China Wind Power is committed to build up a platform of international exchange and getting-together for all the industry participants and facilitate the development of the wind power industry.

Exhibition

Show Floor Space: 16000 sqm Net Show Floor Space: 6592 sqm
 Exhibitors: 249 companies

- 141 are from China (Include HongKong and TaiWan);
- 108 are Overseas
 from 16 countries (Danish, American, Belgium, French, India, Korea, Irish, Italy, Austria, British, German, Spain, Netherland, Singapore, Finland, Swissland)

Conference

The Conference of Global Wind Power 2008 is the first of its kind to be hosted in a developing country, totally hosting 1500 delegates from 26 countries.

CEO FORUM
 TECHNOLOGY PERSPECTIVES - INTERNATIONAL OVERVIEW
 CONTINENTAL FORUM
 MARKET PERSPECTIVES - INTERNATIONAL OVERVIEW
 NAVIGATING THE CHINESE MARKETPLACE - MANUFACTURERS
 NAVIGATING THE CHINESE MARKETPLACE - DEVELOPERS

- TECHNICAL SESSION
- STRUCTURAL DESIGN AND MATERIALS
 - INNOVATIVE TURBINES, COMPONENTS AND SYSTEMS
 - OFFSHORE TECHNOLOGY
 - CONDITION MONITORING
 - RESOURCE ASSESSMENT & SITE ASSESSMENT, CLASSIFICATIONS AND EXTREME WEATHER
 - FORECASTING
 - AEROELASTICITY LOADS AND CONTROL; AERODYNAMICS AND AEROACOUSTICES
 - OPERATION AND MAINTENANCE & SMALL WIND TURBINES AND APPLICATIONS

- POLICY SESSION
- POLICIES AND PROGRAMMES
 - POLICIES AND PROGRAMMES & OFFSHORE: DEVELOPMENTS AND PROSPECTS

Professional Visitors

Job Diversity	Percentage
Department Manager / Area Manager	26.28
Decision Maker/ Managing Director/Owner	22.24
Engineering Developer	17.36
Chief Engineer	11.80
Purchasing Director	9.44
Marketing Developer	8.03
Others	4.85

Visitor Business Catalog	Percentage
Machinery Manufacturer	22.01
Technician / Engineer	18.69
Wind Farm Owner / Investor	15.24
Distributor / Agent	12.43
Domestic & International Trader	10.12
Education / Universities	5.31
R&D Institute	5.31
Governor/ Policy Maker	4.26
Industry Management	4.26
Associations / Societies	2.57
University Students	2.15
Journals	2.1
Others	5.12

Main Exhibitors

Vestas

Comments from exhibitors

VESTAS

VESTAS values the Chinese market and all the three hosts of this event are the Chinese and global partners of VESTAS. It is our pleasure to participate in such an event and believe that best results will be achieved from it.

Sinovel

The Global Wind Power Beijing 2008 has provided Sinovel a platform for promotion and communication/exchange with industry participants.

CSIC (Chongqing) Haizhuang Windpower Equipment Co., Ltd.

China Shipbuilding Industry Corporation (CSIC) has its own criteria in selecting and participating in exhibitions – to be on the same show floor with the best players of the industry and rich professional visitors. We obtained both in the Global Wind Power 2008.

ALSTOM

This event has provided a very sound platform of communication for ALSTOM. We have made our premiere in China for our wind power products. As a leading clean power enterprise in the world, we feel very happy and proud to participate in the development of the wind power industry in China.

Hara XEMC Windpower Co., Ltd.

We are satisfied with what we have obtained in Global Wind Power Beijing, 2008 and will attend China Wind Power Beijing 2009 on a larger scale and in a completely new image.

Zhongfu Lianzhong Composites Group Co., Ltd.

All the major wind turbine manufacturers and blade producers were getting together at Global Wind Power Beijing 2008, driving us a chance to display ourselves in front of the industry professionals and customers.

Dalian Metallurgical Bearing Co., Ltd.

The event was very well organized and we have achieved a lot. We will come back next year and strengthen our participation.

Colorful Corners

“Riding on the wind” Painting Show by children

The organizers have invited 300 children to become the “Wind Kids”, enabling them to know how to make use of the wind around us to serve the human kind and to imagine the changes wind energy will make for us in the future. The kids put their heartfelt words and pictures on paper, mixing the business atmosphere of the event with purity and vividness.

Today, we are riding on the wind and tomorrow the wind is powering the world.

Wind powering the world

China is among the top five countries in regards of the installation capacity. Wind turbines can be seen everywhere in China, on the foot of the snow-capped mountains, alongside the Gobi Desert, on the large grass land, and along the sea shore, making up a magnificent scene.

From among the wind turbine photos taken in China by the Green Peace Organization and others, the organizers of this event have selected a few to entertain their guests with the theme of “Wind Powering the World”, hoping to encourage those who are or will be involved in the wind power industry to go steadfastly along this meaningful course.

China Wind Power 2009

21-23 October, 2009 China International Exhibition Center(New)

Range of Exhibiting

Wind Turbine Generator Systems

- Off-grid WTGS
- In-grid WTGS
- Hybrid Power Systems

Components

- | | | |
|----------------|-----------------------------|-----------------------|
| ■ Rotor blades | ■ Transformer | ■ Software |
| ■ Gearbox | ■ Converter | ■ Wind Resource |
| ■ Generator | ■ Yaw system | ■ Transmission System |
| ■ Brake | ■ Pitch Control | ■ Monitoring system |
| ■ Bearing | ■ Controller | ■ Safety system |
| ■ Axis | ■ Cable/Electric components | ■ Lubricate system |
| ■ Hub | ■ bolt | ■ Composite materials |
| ■ Tower | ■ Heat exchanger | ■ Lift System |

Technical Consulting and Services

- | | |
|----------------------------|----------------------------------|
| ■ Wind Resource Assessment | ■ Site Selection |
| ■ Equipment maintenance | ■ Project Investment and Finance |
| ■ Insurance | ■ Test and Certification |
| ■ WTGS Design | ■ Project Construction |
| ■ Education and Training | ■ Industry and Policy Research |

Booth Rate

Shell Scheme

CNY23000/9m²

Including: Side and rear walls, Carpeting inside the stand, Fascia board with company name, Two Spotlights, One information counter(100L*50W*75H cm), Two Folding Chairs, One 5A/220V Socket, Daily cleaning service.

Raw Space

CNY2300/ m²

- Minimum size of 36 sq.m

Note: No furniture and power facilities are provided. Participating companies should design and erect the exhibition booth on their own.

About Exhibition Hall

New CIEC is one of the top class convention & exhibition complex in China. Most of the grand international events in Beijing have moved to New CIEC from the year 2008. After one year trial operation, it is now capable of providing comprehensive services with international standard.
