

Tianjin Teek Transmission Co., Ltd. is a professional company engaged in the research and development of high precision heavy loading gearbox and its manufacturing, sales and service. It is on the list of National High-tech Enterprise, the principal drafter of national standard of planetary gear transmission. The company introduced know-how Aerogear patent and its manufacturing technology from RENK Germany. With a build-up R&D team head by Dr. Toni Weiss, winner of State Friendship Award, the company has developed the wind gearbox with best reliability and highest transmission efficiency. At present, Teek has been a qualified supplier for Envision, DEC, Datang, Windey and CRRC and series product WG1560, WG2000-3200, WG5500 were developed for these customers.

Huajian Hengjia (Tianjin) Transmission Technology Co., Ltd. is a full subsidiary of Teek specialized in wind gearbox repair and maintenance. Huajian Hengjian has formed a series platform for repairing gearbox from 650kW-3000kW of all brands. We now, as a wind remanufacturing service provider for the widest gearbox types, are strategic cooperation partner for large wind player like Longyuan, Huaneng, Guohua, Datang, CGN, CPIC.
