

## About CQWIC

As a subsidiary of China South Industries Group Corporation, Chongqing Wangjiang Industrial Co., Ltd. (CQWIC) is a large state-owned company that turns out products for both military and civilian purposes. It is also a designated production base for large special-purpose heavy machinery and localization center for major technical equipment introduced from abroad. For years running, CQWIC has ranked among the top 500 of China's best machine manufacturers and top 50 of Chongqing's most successful industrial enterprises. Its enterprise technology center is validated by both the International Science and Technology Center and Chongqing Municipal government.

Founded in 1933 and having operated for over 80 years, CQWIC has excellent capability of large digitalized equipment design, manufacture, complementary integration and quality assurance.

In CQWIC's line of business, wind turbine gearboxes constitute a major part of its civilian products. With a product development team led by one of the excellent talent introduced from abroad by the national government and a digitalized 3D research and development platform, CQWIC is capable of autonomously making research in and developing new products and

has so far successfully developed and are able to provide its customers with a complete series of wind turbine gearboxes across the spectrum from 1.5MW to 8.0MW which are all DNV GL-, CGC- and CCS-certified. During the 13th five-year period, CQWIC will form a multi-series product spectrum of 1.5MW and above applicable for various operating conditions such as high altitudes, low wind speeds, normal and low temperatures, and marine environments

With the firm belief in "quality, technology and service", CQWIC spares no effort to be the world's first-rate and China's leading supplier of ideal wind turbine gearbox system solutions
