

## 瑞联电气简介

Chengdu Reliance Electric Co., Ltd., founded in 1965 in Chengdu, China, is a subsidiary of listed company Tianjin Benefo Tejing Electric Co., Ltd. (SHA: 600468). Reliance specializes in manufacturing electric control and power distribution products, integrating R&D, production, sales and service. The company covers an area of more than 15 acres at Chengdu Qingyang Industrial Headquarters and has over 300 employees, including 120 strong R&D personnel.

Reliance is the leading company in the industry with its excellent quality, various products, strong innovative ability and well-established reputation. The company has state-of-the-art manufacturing equipment and advanced technology, along with a high-level experiment center which was accredited as UL witness laboratory, TÜV witness laboratory and CNAS laboratory. Possessing more than 200 core patents, Reliance participated in setting a number of national and industrial standards, and was recognized as National High-Tech Enterprise, Sichuan Province Enterprise Technology Center and National Intellectual Property Superiority Enterprise of China.

Reliance is the qualified supplier and important strategic partner of many well-known companies at home and abroad. Our products have been serving many major domestic and overseas construction projects such as Three Gorges Dam, Daya Bay Nuclear Station, the Bird's Nest Stadium of Beijing Olympic, German Substation.

Under our motto "Wisdom Achieves Dream, Reliability Determines the Future", Reliance provides exceptional products and excellent services to customers worldwide with loyalty, dedication, innovation and efficiency.

For more than half a century, we have been constantly hard at work!
