

# Industry Leader in Prestressed Lattice Steel Pipe Wind Turbine Tower Technology

## company profile

Qingdao Huastro Energy Technology Co., Ltd. is a high-tech enterprise specializing in the R&D, manufacturing and installation of wind tower, energy - saving and environmental technologies. In cooperation with Tongji University, Huastro developed prestressed lattice wind tower technology for 140 m, 185 m and 200 m+ high-hub applications. The company owns 40+ domestic and international patents and provides technical consulting and services for energy companies and wind turbine OEMs.

## corporate culture

### vision

To become a leader in the low-wind-speed wind power sector and set an industry benchmark.

### Mission

One Tower, One Passion.  
 Working Hard for a Greener Earth!

### Values

Unity, Pragmatism,  
 Efficiency, Innovation

### Spirit

Adhering to the corporate spirit of Virtue, Innovation, Inclusiveness and Perseverance.

## Technical Advantages

High reliability、 Green and low-carbon、 Land-saving technology、 Multi-scenario application  
Eco-friendly & environmental protection、 Life Cycle Cost Optimization (LCCO)

## Company Performance

Juancheng Tower:  
1 unit (160 m)

CR Power Jiaozhou  
Tower: 1 unit (140 m)

Jin Jiaozhou Project:  
19 units (160 m/170 m)

Huaneng Wuqi Project:  
27 units (160 m)

CEEC Yuanjiang Project:  
10 units (160 m),

Huaneng Dezhou  
Xiaomiao Village Project:  
4 units (160 m)

CGN Wenshang Project:  
8 units (170 m)

Huaneng Dezhou  
Pingyuan Project:  
30 units (160 m)

Goldwind Tianrun Boli Project:  
3 units (185m)

Huaneng Anhui Mengban  
Phase II: 6 units (160m)

Huaneng Anhui  
Mengcheng Project:  
12 units (160m)

China Coal Yongcheng  
Project: 6 units (160m)

Three Gorges Hubei  
Energy Project:  
1 unit (185m)

Huaneng Jingbian  
Project:  
1 unit (200 m)
