

Company Profile

Shanghai Anxiong Chemical Technology Co., Ltd. is an official authorized distributor of 3M, with years of deep expertise in the industrial bonding sector. Headquartered in Shanghai, we extend our coverage across East China and serve manufacturing customers nationwide, providing automotive parts, new energy, electronic & electrical appliances, machinery and equipment manufacturers with genuine 3M industrial materials, professional product selection solutions, and one-stop supply chain support services.

Backed by complete qualifications, stable supply and fully traceable products, we leverage 3M's original manufacturer technical and inventory systems to resolve a wide range of process pain points — including weak bonding, insufficient heat resistance, oil resistance failure, noise and vibration, underbody protection, and masking and conformable adhesion — helping manufacturers optimize their processes, improve yield, and lower overall production costs.

Core Business Scope

Main business: sales of industrial chemical materials, bonding technology consulting, and delivery of industrial supporting solutions.

Compliant operations: sales of chemical products (excluding hazardous chemicals), industrial adhesives, industrial tapes, functional protective materials, supporting auxiliary materials, and technical implementation services.

Core Products

I. Industrial Adhesive Series

DP-series structural adhesives, VHB bonding adhesives, multi-purpose spray adhesives, primers (adhesion promoters), sealants, potting compounds, and adhesive removers/cleaners.

Applications: high-strength structural bonding, seamless conformable adhesion, waterproof sealing, reinforcement and fixing, and workpiece rework, among other process scenarios.

II. Industrial Functional Tape Series

VHB acrylic foam double-sided tapes, crepe paper masking tapes, fiberglass-reinforced filament tapes, aluminum foil heat-insulation tapes, and nylon mushroom hook-and-loop fasteners.

Applications: body panel bonding, interior trim fixing, spray painting masking, equipment insulation, and detachable fastening, among other scenarios.

III. Complete Compliant Support Services

Full provision of original manufacturer compliance documentation, including TDS, MSDS, RoHS, REACH, and COA reports; support for free sample testing, small-batch prototyping, project registration, direct technical liaison with 3M, and stable volume supply.

Industries We Serve

Precisely serving high-end manufacturing sectors, including the new energy industry, automotive

parts, electronic & electrical appliances, sensors, home appliance manufacturing, and automated machinery & equipment.

We provide customers with a full closed-loop service covering: product selection recommendations, on-site process guidance, fast shipment from stock, dedicated order follow-up, direct liaison with the original manufacturer's CSR (Customer Service Representative), and after-sales quality complaint handling.

Core Advantages | Why Customers Choose Us

1. **Genuine Product Guarantee:** All products are sourced directly from 3M's original factory. Batches are traceable, quality is consistent, and counterfeit products are eliminated.
2. **Professional Expertise:** With years of deep expertise in bonding technology, we provide targeted solutions to address challenges such as high/low temperature resistance, oil resistance, waterproofing, vibration resistance, stone-chip resistance, and high-strength bonding.
3. **Efficient Delivery:** With regularly stocked inventory, we support urgent order shipment and stable volume supply, protecting customers' production schedules.
4. **Comprehensive Service:** One-on-one follow-up throughout the entire process—from sampling and product selection, to project registration, supply, and after-sales technical support.

Corporate Philosophy

Genuine products as our foundation, professional expertise as our value, efficient fulfillment as our commitment, and long-term win-win as our goal.

We build our market position on consistent quality, create value through professional technology, and continuously deliver reliable, worry-free, and efficient total solutions for industrial bonding materials to manufacturing enterprises.

Shanghai Anxiong Chemical — dedicated to genuine 3M industrial bonding materials.

Genuine products ensure stable quality; professional expertise solves process challenges; dependable service safeguards production!

We warmly welcome customers from all industries to visit our booth for exchange, sample comparison, and discussions on long-term cooperation!
