

Handan Zhaoyun Electric Power Fasteners Manufacturing Co., Ltd.

Company & Product Introduction

I. Company Profile

Handan Zhaoyun Electric Power Fasteners Manufacturing Co., Ltd. is located in the Southwest Industrial Zone of Yongnian District, Handan City, Hebei Province. Having years of deep cultivation in the fastener industry, it is a modern integrated manufacturer integrating R&D, production and sales of fasteners for electric power, wind power and infrastructure projects. The company also serves as a high-quality cooperative supplier for major central enterprises including State Grid Corporation of China and China Southern Power Grid.

Boasting a large factory area and advanced production equipment, the enterprise is equipped with full sets of intelligent production lines for automatic cold heading, heat treatment and hot-dip galvanizing, as well as a standardized testing laboratory. In strict compliance with the ISO9001 quality management system, we control product quality throughout the whole production process. Our main products cover electric transmission tower bolts, anti-theft fasteners, anchor bolts, hoops, large-size special bolts for wind power, highway infrastructure fittings and more, featuring complete categories and diversified specifications. All products meet high industrial standards in anti-corrosion performance and mechanical strength.

The enterprise has been awarded numerous qualifications and honors such as High-tech Enterprise, Specialized, Sophisticated, Unique & Innovative Little Giant Enterprise and National Green Factory, demonstrating solid technical strength and stable production & delivery capacity. Adhering to the development philosophy of integrity-based operation and quality supremacy, we supply products nationwide with reliable quality and comprehensive services. Our products are widely applied in key infrastructure sectors including power transmission and transformation, wind power generation, photovoltaic projects and road transportation.

Looking ahead, the company will keep focusing on product upgrading and technological innovation, committing itself to providing safe, reliable and cost-effective complete fastener matching solutions for customers at home and abroad to achieve win-win cooperation.

II. Main Products

1. Grade 10.9 / 12.9 high-strength bolts for wind turbine towers and power transmission towers
2. Bolts for photovoltaic supports and anti-loosening fasteners
3. Weathering steel bolts and embedded anchor bolts
4. Wind power anchor bolts and bridge bolts
5. Bolts for metro pipe galleries and steel structures
6. Other high anti-corrosion fasteners with hot-dip galvanized, Dacromet or zinc-aluminum coatings

III. Quality & Service Commitments

1. We shall strictly assume primary responsibility for product quality, control all production procedures to ensure all delivered products meet technical specifications, with a 36-month quality guarantee period.

2. We shall abide by the principle of integrity operation, participate in bidding and production & business activities in accordance with laws, and eliminate all dishonest and illegal business practices.

3. We will continuously strengthen after-sales support and technological innovation, improve the full product traceability and after-sales service system, and enhance core product competitiveness via technological upgrading.
