Shanghai Tongding Building Materials Co., Ltd.

ABOUT US

Shanghai Tongding Building Materials Co., Ltd., established in 2014, specializes in supplying concrete blocks, precast concrete components, and various construction materials.

We offer direct supply from the source, support customized specifications, and serve infrastructure projects both domestically and internationally. Committed to quality, we provide stable and reliable building material solutions for engineering projects.

PRODUCT PRESENTATION

一、Cement Protective Layer Spacers

Types: Round, square, plum blossom、crescent-shaped spacers, etc.

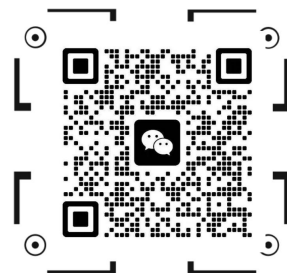

Advantages: High hardness, standardized specifications, widely used in wind power and bridge projects; non-standard customization available.

二、Galvanized Binding Wire for Construction

Features: Rust-resistant and highly durable, specifically designed for rebar bundling; multiple specifications available in stock.

APPLICATION CASE

APPLICATION CASE

高 矽®

WIND ENGINEERING

High-standard construction, strict quality control, ensuring the safe and stable operation of wind power projects.

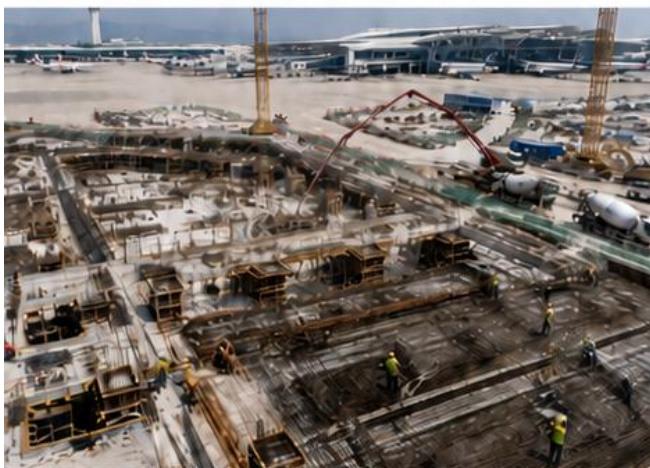

NUCLEAR POWER PLANT

Professional supporting solutions, safeguarding the construction of nuclear power projects.

AIRPORT CONSTRUCTION

High-quality products and services, supporting the construction of modern airports.

BRIDGE CONSTRUCTION

Reliable supporting products, contributing to the building of every major bridge.
